

Ray Sexton's 90 Birthday Celebration

On November 30th the club got together at the field to celebrate Ray's 90th birthday!

Ray is one of the founding members of the club and we have appreciated all his help and advice over the years! He is an expert on model gas engines and can fine tune any engines!

Ray is also an excellent RC pilot. He flies better than most of us at his young age of 90! We can only hope to get as good as him someday!

Here are a few photos that Horace Harwell took at the celebration!

Thanks Horace!
